Cashmaster®
Counting your success

Count-by-Weight versus Friction-note Counters

Count-by-Weight

Friction-note Counters

PROS

- Portable
- No moving parts
- Little or no service issues
- Also counts coins
- Ability to verify packaged notes and coins
- Various connectivity available
- Mains and battery
- Silent operation

- Fast
- Complete cash count data identified to individual tills or branch level for audit purposes
- Complete cash-count data transfer available to individual count level
- Full command set available for integration with back office
- Customisable - user-selectable operational modes designed to fit specific cash-counting workflow

- Counterfeit detection
- Fast
- Batching (stop at 100 for strapping)
- Sorter versions (expensive)
- Off sort version (removes wrong denominations)

CONS

- No counterfeit detection
- Perceived as slower in notes mode

- Requires high maintenance
- Generates paper dust and dirty contaminants
- Moving parts subject to wear and tear
- Sensors require regular cleaning

- Mains only (not portable) with a large footprint
- Difficulty handling poor quality notes
- Noisy operation
- Costly repairs
